

SUMMARY

Generative AI Engineer specializing in LLM infrastructure, developer tools, and AI automation systems. Experienced in building OpenAI-compatible APIs, streaming services, AI agents, and production-ready backend applications using Python and NextJS.

EXPERIENCE

- **Exultsoft Technologies Pvt. Ltd.**
Software Development Engineer

Oct 2025 – Present
India

- Developed Android and iOS applications with backend APIs and MySQL databases for production deployments.
 - Implemented authentication, order management, and real-time workflows for a food ordering applications.
 - Collaborated on API integration, feature development, testing, and production releases.

• **Datapattern AI**
AI Engineer Intern

Apr 2025 – May 2025
India

- Developed AI-driven features and integrated machine learning components into existing applications.
 - Built data preparation pipelines and assisted with model integration and evaluation workflows.

• **Freelance Developer (Remote)**
Software Development Engineer

Aug 2024 – Oct 2025
Remote

- Built full-stack web applications and AI-powered solutions for startup clients using React.js, Next.js, Node.js, and Flask.
 - Developed Python automation and web scraping tools using BeautifulSoup to streamline data collection workflows and generate leads.
 - Integrated REST APIs, authentication, and database-backed features across client projects.

PROJECTS

• **Indus LLM Gateway — OpenAI-Compatible LLM Gateway (Go):**

Designed a self-hosted OpenAI-compatible gateway for routing requests across multiple LLM providers. Implements authentication, API key quotas, prompt templating, session memory, and SSE-based streaming. Instrumented Prometheus metrics for latency, token usage, and cost monitoring across all requests.

• **INDUS Terminal — Developer CLI System (Go):**

Engineered a CLI system for API orchestration and command pipelines using the Go standard library. Includes streaming pipelines via io.Pipe, retry/backoff HTTP handling, and a custom shell execution environment. Packaged as a portable Windows CLI with PATH integration for global usage.

• **AI Recruitment Platform:**

Developed an AI-driven hiring system that automates resume evaluation, candidate outreach, and interview scheduling. Uses Gemini-based scoring logic for role-aware assessment and decision workflows. Automates communication via Gmail SMTP and Zoom API, reducing manual recruiter effort.

• **PodcastAgent — Multi-Speaker AI Podcast Generator:**

Built a system that transforms text into conversational multi-speaker podcasts using LLM-generated dialogue scripts. Integrates Edge TTS and gTTS for voice synthesis across speakers. Provides a Gradio interface for real-time generation and audio export.

• **AI Tutor — Local AI Study Assistant:**

Implemented a privacy-focused AI tutor running fully on local LLMs via Ollama without external APIs. Supports multiple models including Gemma, Llama, and DeepSeek for adaptive explanations. Generates quizzes and structured feedback to improve learning efficiency.

• **DeepResearchAgent — Autonomous Research System:**

Built an autonomous research pipeline for web search, extraction, and report generation. Combines DuckDuckGo search, BeautifulSoup scraping, and LLM-based synthesis. Produces structured Markdown and PDF reports with step-by-step execution tracking.

SKILLS

• **Programming Languages:**

Go, Python, JavaScript, TypeScript, Bash

• **Backend & Systems:**

REST APIs, Streaming APIs (SSE), Authentication, JWT, API Design, Concurrency, System Design Basics

• **AI / LLM Engineering:**

LLM APIs, RAG Pipelines, AI Agents, Tool Calling, Prompt Engineering, Ollama (Local Models), Hugging Face Transformers

• **Frontend:**

React.js, Next.js

• **Infrastructure & Tools:**

Git, GitHub, Supabase, Vercel, Flask, Node.js, Observability (Prometheus basics)

EDUCATION

• **Excel Engineering College, Tamil Nadu**
Bachelor of Engineering – Computer Science and Engineering; CGPA: 7.56

India
Nov 2022 – May 2026

• **Ram Dayal Subh Narayan High School, Chhapra**
12th (Science); Marks: 57.6%

India
Nov 2020 – Mar 2022

ACHIEVEMENTS

- **1st Place – AI Hackathon (Excel Engineering College & Payoda Technology Inc.):** Led a 6-member team to build an AI agent with chatbot and automated appointment scheduling within a 30-hour hackathon. Implemented secure backend workflows using Supabase Auth and RLS.
- **Software Engineer Certification – HackerRank (Dec 2025):** Cleared multi-stage coding assessments covering problem solving, SQL and REST-based system design using Python and JavaScript.

LEADERSHIP

- **Open-Source Contribution Program** Excel Engineering College
Technical Mentor & Coordinator Mar 2025
 - **Mentorship:** Conducted Git and GitHub training sessions and guided 100+ students in making their first open-source contributions and working on collaborative projects.
- **Techno-Debuggers Coding Contest** Excel Engineering College
Event Lead Apr 2025
 - **Event organization:** Organized a three-round coding competition (MCQs, coding and debugging) on HackerRank and managed event logistics with student volunteers.

CERTIFICATIONS

- **Generative AI – Databricks Academy:** Jul 2025
- **Enterprise Data Science – IBM:** Nov 2023
- **Career Essentials in Generative AI – Microsoft & LinkedIn:** Oct 2023
- **Programming in Python – CISCO:** Aug 2023
